

## Eternal Sunshine - Oil-less Planet

*Terence Jeyaretnam*

Peaking Saudi oil  
Beams Aljazeera dot net  
Post oil Dubai, a holiday hotspot  
El Paso and Ghawar oil  
No such field we'll find I bet  
Cost more than a mythical sunspot

[Chorus]

Decomposed dinosaurs  
And decaying plants  
Fuel our cars  
And our chemical plants  
Petrol and diesel – liquid gold  
Coal and gas – heat and cool  
But when all the gold is sold  
What happens to hot and cold?

Rising price of oil  
Seems a solution in debt  
Solar, wind, hydro-gen suit  
A better vaccine to oil  
Not much more can be said  
The sad state of political sport

Eternal sunshine on our soil  
A resolution, just wait  
Non-carbon intense snort  
A softer touch of our soil  
A hot shower and a cold beer  
We can have without good old oil
