

## Faith

*Terence Jeyaretnam*

Faith in the fellow being  
A voice unheard in the lonely forest  
To think before doing  
The last leaf on a lonely tree  
Faith is the answer to a broken promise  
A misused planet, an ailing race

[Chorus]

Have faith, have love  
For what we have is simply lust  
Have faith, have less  
Growing greed and its hunger-less thirst  
Have faith, have some  
More respect for the planets' soul  
Have faith, feel free  
To do what's right and not what's not

Faith is the maternal loving  
Missed like heavy rain in the desert  
To act on what we believe in  
The caged mind that wished it were free  
Faith is but all we have in compromise  
The worry lines grow with the pain increase

Faith is the night sun shining  
Shadowing moonlight on the mountains  
To live a life without  
Leaving deep footprints on the sand dunes  
Faith is just what we need  
To love our world and save its face
